PROFILE

Product Designer with 3+ years designing B2B SaaS, enterprise and e-commerce products end to end — from user research to shipped interface. Built a company-wide design system from 0-to-1, own research-to-ship cycles, and deliver accessible interfaces to WCAG 2.1 AA. Enterprise experience includes UX for an internal SAP rollout following SAP Fiori Design Guidelines. Law degree adds structured analytical method and working fluency with GDPR and accessibility regulation.

PROFESSIONAL EXPERIENCE

Product Designer — UX/UI & Web · Horl 1993 GmbH, Freiburg, Germany · Sep 2023 – Present
Promoted from Junior UX/UI Designer (Sep 2023 – Dec 2024). One of two designers on the digital track in a four-person design team.

- Designed and shipped Horl's **first product design system from 0-to-1** — design tokens, component library and usage guidelines in Figma — adopted across web and mobile by design and engineering.
- Led the end-to-end redesign of priority e-commerce flows: **+22% user engagement** (Google Analytics 4).
- Owned UX flows and interface logic for the internal SAP rollout, applying **SAP Fiori Design Guidelines** and aligning operations stakeholders with engineering across complex approval workflows.
- Ran **15+ usability tests and 10+ user interviews** (think-aloud, card sorting, heuristic evaluation) in Maze and Hotjar; converted findings into shipped information architecture and navigation changes.
- Delivered redesigned flows to WCAG 2.1 AA — colour contrast, focus order, keyboard navigation, semantic structure — in line with EAA/BFSG requirements.
- Led Amazon brand creative (listings, A+ Content, Brand Story): **+17% sales across priority SKUs** (Amazon Brand Analytics).
- Built interactive prototypes in Figma and Framer; tightened developer handoff through token-based specs and documented component states.

Freelance Product Designer · Remote · 2023 – Present
Selected clients: Envisia (B2B telecom SaaS), Dekozauber by Pierre Kublik, further B2B clients under NDA.

- Envisia — **multi-tenant B2B contract-management SaaS in production**: owned end-to-end UX for contract-assignment workflows, admin dashboards and role-based access; Tailwind design tokens, component-driven design, WCAG 2.1 AA, GDPR-compliant.
- Rebuilt employee onboarding as a guided wizard, cutting the flow **from 45 to 14 minutes (−68%)**; reduced data-entry errors through centralised validation and progressive disclosure.
- Designed B2B SaaS interfaces for further NDA clients — admin dashboards, multi-step workflows, role-based access patterns.
- Used AI-assisted tooling (Claude Code, Lovable, Figma Make) to take concepts to working prototypes in days instead of weeks.

Design Intern · Eurobrands Group, Cologne, Germany · Jan 2023 – Sep 2023

- Ran UX research (user surveys, competitive analysis) to inform landing page and campaign design.
- Designed landing pages on cognitive-psychology and UCD principles, lifting engagement across paid acquisition; produced creative for Meta campaigns and improved CRM interface usability for internal teams.

SKILLS

UX & Research — User-centred design (UCD), design thinking, user research, user interviews, usability testing, heuristic evaluation, card sorting, A/B testing, user journey mapping, personas, wireframing, information architecture, interaction design, user flows, prototyping, responsive and mobile-first design, ISO 9241-110

Design Systems — Design tokens, component libraries, atomic design, Figma Variables and Auto Layout, design system documentation, UI governance, design-to-code handoff

Accessibility — WCAG 2.1 / 2.2 AA, European Accessibility Act (EAA), BFSG, accessibility audits, keyboard navigation, focus management, screen-reader-ready semantics

Enterprise & B2B — SAP Fiori Design Guidelines, ERP and internal-tool UX, admin dashboards, multi-tenant architecture, role-based access control (RBAC), complex approval workflows, legacy modernisation

E-Commerce — Conversion-oriented redesign, product-detail and checkout flows, Amazon A+ Content and Brand Story

Tools & Front-End — Figma, Framer, Adobe Creative Cloud (Photoshop, Illustrator, InDesign), HTML, CSS, Tailwind CSS, working knowledge of React component structure, Git basics

AI-Assisted Design — Claude Code, Claude Design, Figma Make, Lovable, Gemini, Midjourney; prompt-driven prototyping, EU AI Act transparency requirements

Analytics & Ways of Working — Google Analytics 4, Matomo, Hotjar, Maze, Optimizely; Jira, Miro, Notion, Agile / Scrum, cross-functional collaboration, stakeholder management, design critique, workshop facilitation
